Digital

Moving Health For Doctors  
Digitally

During early 90's General Physician used to refer a critical patient to a specialist doctor. After the treatment of the patient by the specialist; the specialist used to pay a remuneration to the local physician. This was one way of marketing.

There were few Medical Executives hired by Doctors who used to stand outside Clinics, Hospitals or Medicine shops waiting for patients. If the patient is suffering from supposed Back Pain they used to refer an Orthopaedic Specialist, took them to the doctor and used to receive a commission from the doctor on behalf of the patient.

Since 2016 there was a massive change as JIO came into the market, everyone started using a smartphone, internet became cheap and so on. Each and every business started making their presence online, digitally. As digital marketing is cost effective, and day by day the number of users in the digital platform is increasing and so are the businesses.

Then In 2000 with the rise of commercial hospitals Digital Media got into the scene, Doctor started giving advertisements in Newspapers, via leaflets, Magazines and so on.

Everyone started establishing their businesses online, on platforms like FACEBOOK, GOOGLE, INSTAGRAM, YOUTUBE, LINKEDIN, TWITTER, WEBSITE etc.

## **Now the doctors might ask, Why digital marketing is important for Doctors or Healthcare Professionals?**

Let us begin with a study showing  
**Digital Marketing Benefits  
over Medical Professionals,**

# DIGITAL MARKETING PLATFORMS REQUIRED FOR A **DOCTOR**

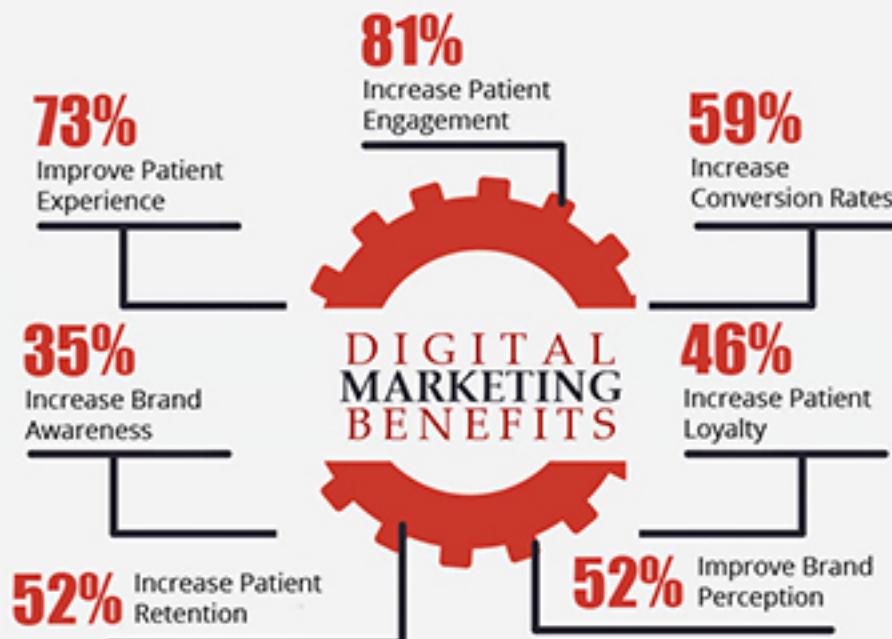

Google My Business

Google Ads

# DIGITAL MARKETING PLATFORMS REQUIRED FOR A DOCTOR:

**As we can see with Digital Marketing,  
what benefits can a Doctor get.**

## 1) GOOGLE MY BUSINESS / GOOGLE LISTING

In Simple words Google My Business is tool offered by Google which will increase your visibility on Google Search & Google Maps.

>Google My Business makes it easy for patients to find you.

>Google is the most popular of the big three search engines, owning more than 80% of the total search volume worldwide.

>Over time, Google has made many changes to how it displays search results for patients looking for information about health related conditions, injuries, and treatments giving preference to healthcare providers located closest to the searcher's physical location.

Now-a-days potential customers rather patients search almost everything on google. So for a doctor it is very important to have a google listing.

Example: Mr. Ram Kumar Jha is suffering from Joint Pain. He cannot walk properly, so he went on Google and asked "Best Orthopedic Doctor in Kolkata" as he lives in Salt Lake so the search results comes up with all the orthopaedic doctors near Salt Lake

# IMPORTANT FACTS ON GMB:

## Google My Business is critical for your local SEO.

As we stated earlier, when a patient searches for a medical provider on Google, instead of seeing doctors nationwide, Google uses the patient's location to display local doctors in the top results.

## One important feature of local SEO is Google's "3-pack."

>When a user searches for a type of medical practice, Google shows the top three Google My Business profiles near the user in the form of a map indicating clinic or office location and then a list of three providers, with basic information (name, address, phone, website, directions).

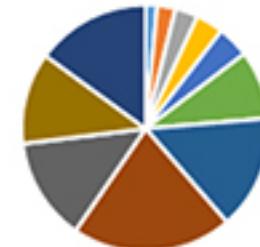

>Google determines which businesses show up in the 3-pack based on relevance, distance, and prominence (see more below on how to optimize your profile).

>Your Google My Business listing will also show up in Google maps. If a user types in hand surgeon into Maps, Google populates the search with nearby hand surgeons.

Here are some facts, according to google statistics Doctors in the respective field of Obstetrics & Gynaecology, Infertility, Orthopaedic, Cardiology, Oncology, Otolaryngology competition is much higher in google listing. So it is way too tough to optimize their account.

On the other hand Doctors in the respective field of Ophthalmology, Fetal Medicine, Nephrology, Bariatric Surgeon, Sleep Medicine etc. the competition is very much low. So, it is quite a easy task to rank them, of course with proper keyword analysis.

## GOOGLE STATISTICS

With Google My Business come Google Ads, in simple words with Google Ad Words you are going to receive more views on google as it is an inorganic approach, you have to spent an amount for it. In google my business with regular optimization you will receive an organic reach.

## FEW KEY POINTS ON GOOGLE Ads:-

- A) **Get top on the google** immediately with google adwords.
- B) **Target the Patients you want** - One of the best features about Google AdWords is its ability to target people within a certain geographic area. After all, if you are an urgent care center in Salt Lake, Kolkata; then you don't want to be paying for ads for people in Budge Budge!
- C) **Track Results** - There are many tracking options. Google refers to them as "Conversions". Using code provided by Google, you can track the success of your ads. This includes tracking how many calls you received (and whether these calls were from the ad or from your website). It also includes the ability to track if patients later scheduled an appointment on your website. By tracking results, your practice can calculate how much you are paying for each conversion.
- D) **You Only Pay when someone clicks** - Unlike other forms of online advertising (e.g. Facebook), you only pay when someone clicks on your ads. This is known as Pay Per Click (PPC). It means that you are not wasting your advertising budget on ads which are not of interest to people.
- E) **The Percentage of Google Ads Clicks Is Increasing** - According to WordStream, the percentage of consumers clicking on Google Ads (instead of the organic search results below) is increasing.

Now let's move onto Facebook,

## 2) Facebook Marketing

Facebook Plays an important role, it is an incredibly powerful way to develop a direct know, like and trust relationship with patients that it would have been difficult to reach in the past. Now you can bring them into your chamber or your clinic and show them your exact approach to patient care.

Facebook helps in the following arenas:

> Establishing Your Practice Brand in the Community - Allow patients to easily find out the basics of your practice. A Facebook page will help you to connect in a better way with your patients. Slowly & steadily it will develop a bond between you and your patients. By posting regular contents regarding your practicing domain, creative posts & Videos, Blogs. It will also allow you to connect with your patients through Facebook Messenger & Whatsapp Business. You can post regular updates if you want. And thus it will enhance your patient volume for treatment. And thus it will establish your practice brand.

> Drive new patient traffic to your page - With the help of Facebook ads you can drive patient into your page, website. It can be set up to target greater site traffic, more impressions, and even click-through-rate (CTR). Facebook ads are cheapest compared to all other ad platform.

> Improve and Streamline Patient Engagement & Customer Service : Gone are the days waiting on hold or leaving a message. Patients can interact effortlessly and ask questions with a reliable and speedy response.

On your post with the help of CTA (Call to action) button you can easily get connected with your patients. With automated response you can reply to your patients effortlessly.

## FACEBOOK ADVERTISING FOR DOCTORS :-

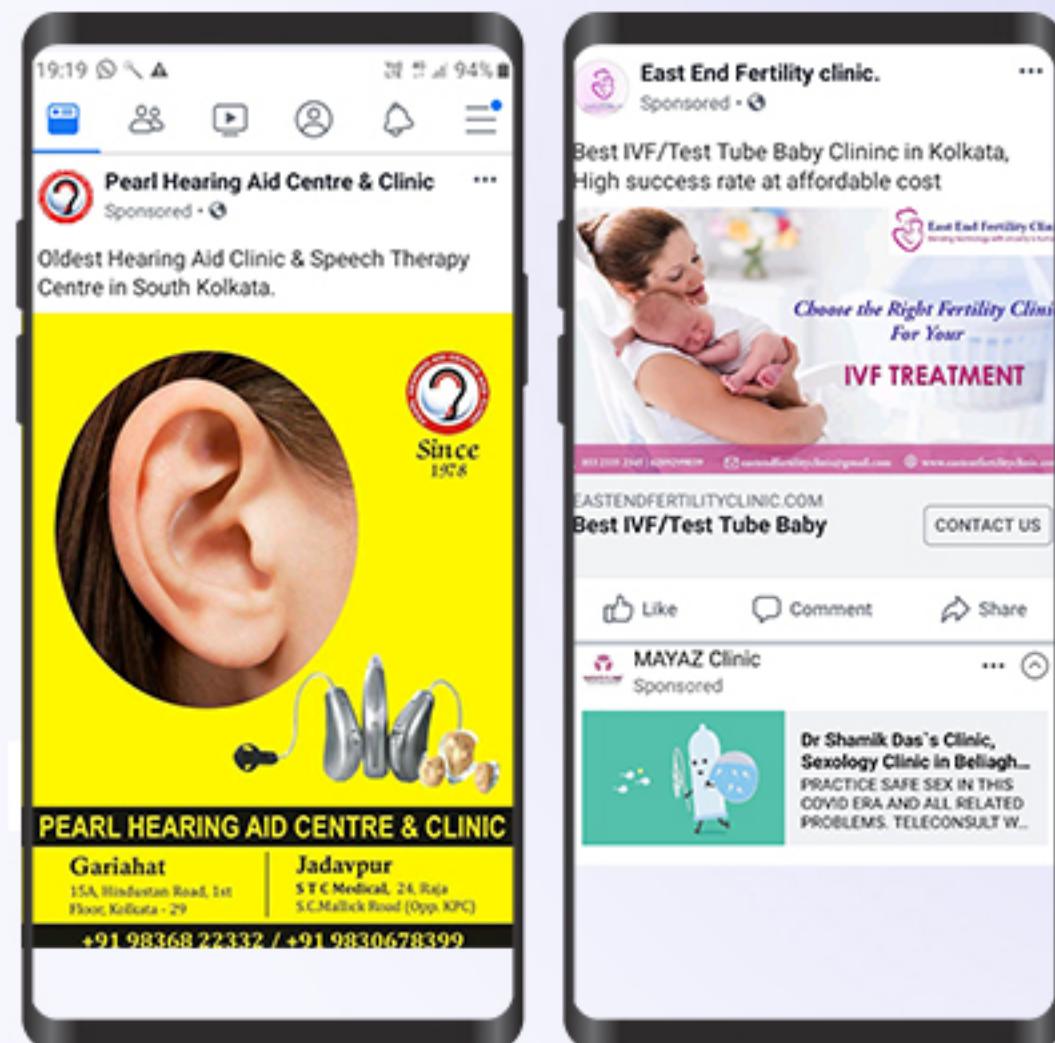

### What is Facebook Advertising for Doctors?

>Facebook advertising for doctors is a way for doctors to increase their online exposure (and new patients) by advertising on Facebook.

>Anyone who has Facebook will be familiar with the "sponsored" posts which appear on your wall. These have been paid for by companies who are 'targeting' you. And when we say 'target', we mean exactly that. Facebook advertisers can choose their target audience, including age, gender, location, and even pages or activities users have previously 'liked'.

>In terms of doctors doing the advertising, the same is also possible. You can pretty much select your 'ideal' patient, at least in terms of age, gender, and location. This helps to ensure that your advertising budget is not wasted on a target demographic which is unlikely to require your particular type of healthcare services.

Few screenshot of sponsored ad post by a doctor & a hospital,

Here you can see under the video there are two advertisement one of Dr. Moumita Naha & IRIS Hospital. This is one of the example of facebook ad campaign

## ADVANTAGES OF FACEBOOK ADVERTISING FOR DOCTORS :-

**1. Increase your number of patients :** Let's be honest - this is the ultimate goal of any medical advertising: It is to increase your number of patients. Of course, not all Facebook users who see your ads will become patients of yours. In fact, it will be a low percentage. However, even just a few extra patients usually more than covers the cost of a Facebook campaign.

**One thing is for sure** - if you do not do any marketing or advertising, then less people are likely to hear about you. If less people hear about you, then less people are likely to choose you as their next doctor.

### 2) Increase your number of Facebook Likes :

Many Facebook ads give users the opportunity to 'like' your page. This means that from then on, whenever you post something new, it is likely to appear on that user's wall. This increases ongoing exposure to your practice. The more people who like your page, the more people are being reminded about your practice every time you post something new. In short, building up your online community helps to keep your practice on patients' radar.

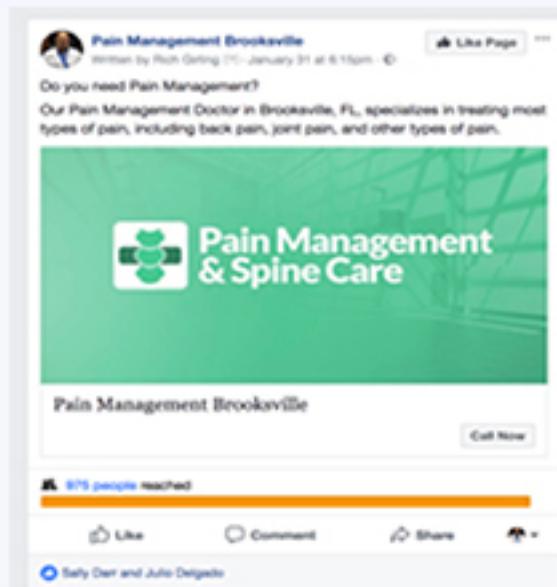

### 3) Target your ideal patient:

As mentioned previously, Facebook advertising allows your ads to be very targeted. You can be very specific for any of the following criteria:

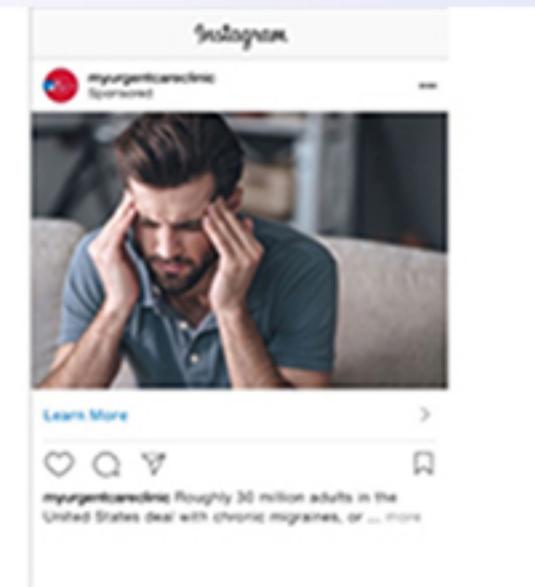

- 1) Age**
- 2) Gender**
- 3) Location**
- 4) Likes / Interests**
- 5) Job title**

## By being specific with your ads, you are able to target your 'ideal' patient.

*This is how it appears in facebook.*

*This how it appears in Instagram. We would like to suggest if you are an Plastic & Reconstructive Surgeon, if you are an IVF specialist Instagram is for you we can design the post aesthetically. All the facebook ads will be automatically showed up on your Instagram handle.*

### 3) YouTube Marketing -

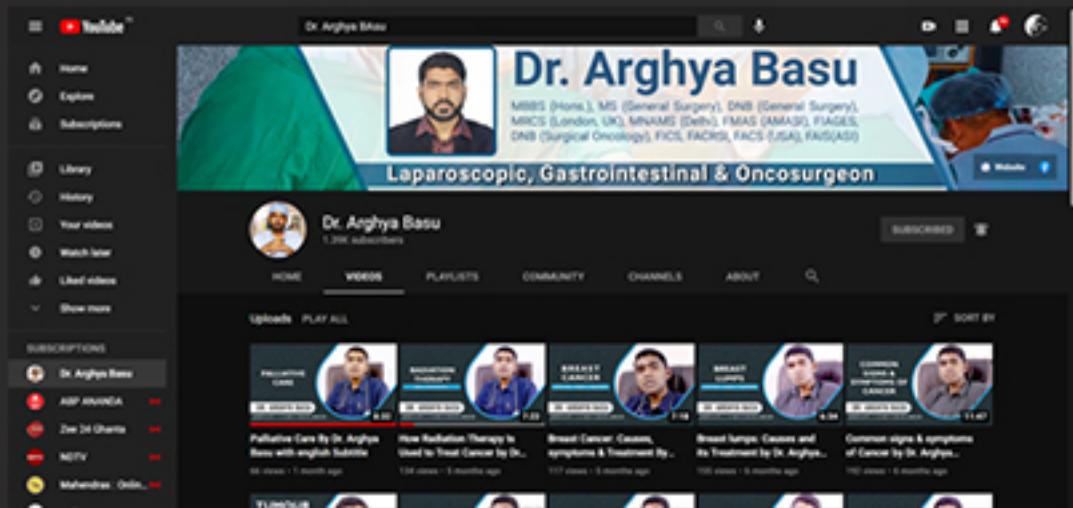

> You are a specialist share your knowledge! Inform your patients about your training, degrees, and a unique approach to specialization with their care.

> Many physicians have gained massive practice success by utilizing YouTube to educate patients and physicians on procedures or health techniques.

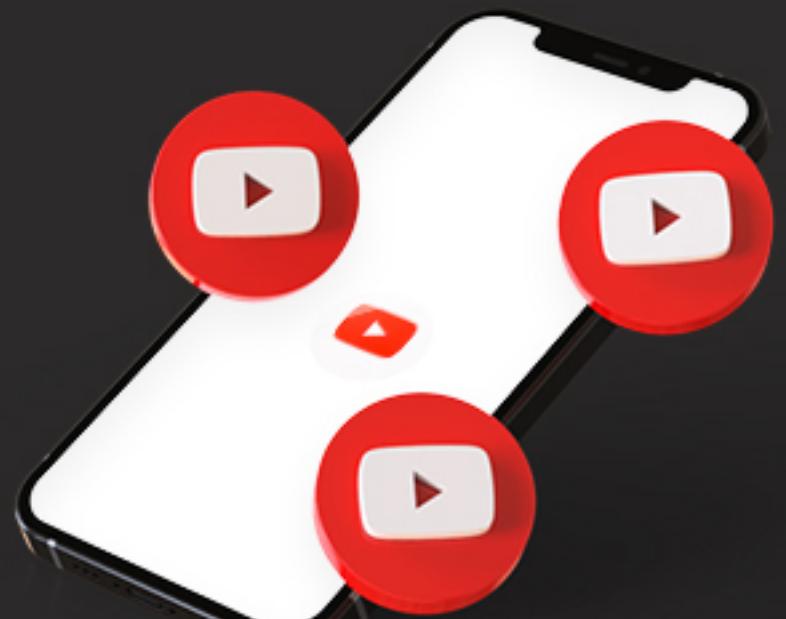

> We have found video can be a great way for a doctor to get involved in social media and share their expertise without having to sit down and write a 2,000-word blog post.

> Once you get down your voice, style, and templates it should not take that long to pump out 60-90 second videos on interesting topics in your field. Patients will soak this information up and can even be used as a springboard to land speaking opportunities.

**It will also help you to upload patient testimonials for better engagements.**

An youtube page of one of our clients.

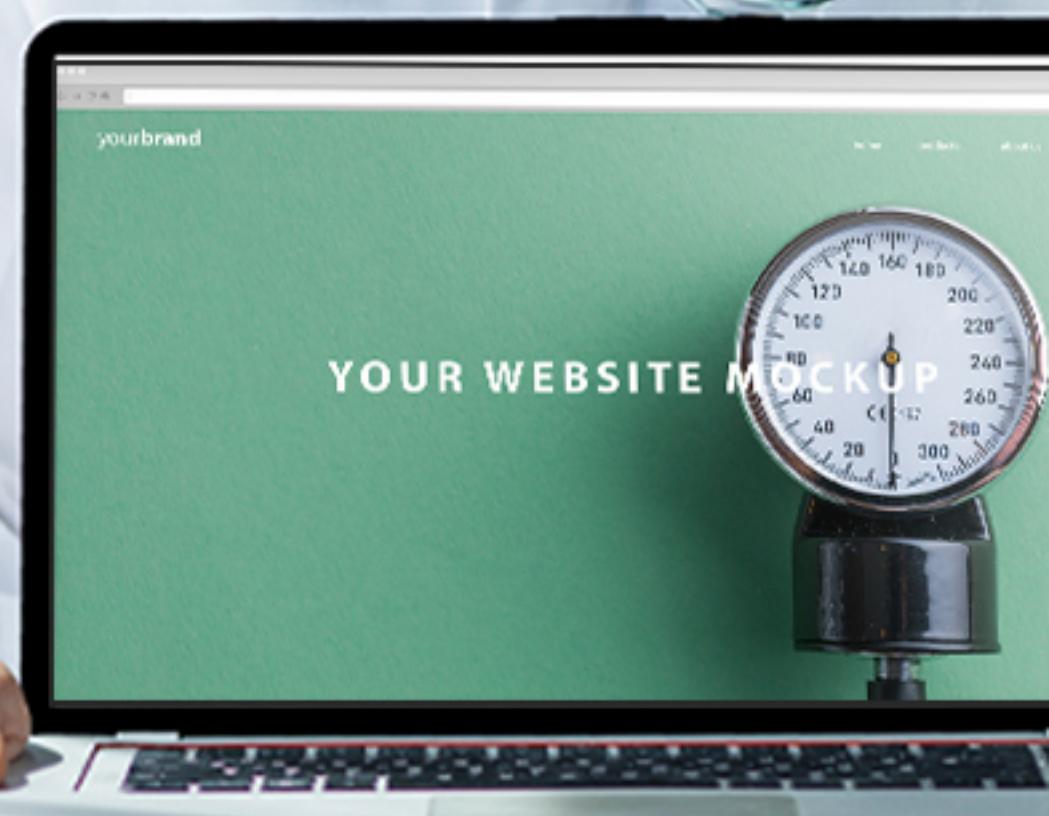

## 4) Website -

> For doctors, the website provides value-added services for the existing and new patients, by providing details as to the timings of the clinic and how to get to the clinic. It also allows you to answer routine patient's queries by email. Patients are thirsty for information about their illness, and many will use the Net to find information. However, most patients would much rather get information from their own doctor, and if you provide this information on your website, your patients know they can trust it. Your website will also save you a lot of time!

> But according to a study, usually a patient spends 10-25 Seconds in a doctor website compared to any other websites. Instead of making a 3-4 page website ; it would be better to have a 1 page website with relevant details such as -

- 1) Contact Details
- 2) Address
- 3) Services
- 4) Patient Testimonials
- 5) Blogs.

**So, all of these are not an  
easy task to do by a  
Medical Professional  
or a Doctor alone.**

*That's where we come into the picture.*

**So, What we need from you to  
start the digital journey?**

## For Google My Business :

1. Please provide precise, accurate address and/or service area to describe your business location. P.O. boxes or mailboxes located at remote locations are not acceptable. Only one business location will be accepted. You can provide us with service areas (Only 18 service areas can be updated on Google Listing not more than that). [One genuine business address and 18+ Service Areas]
2. Provide a phone number that connects to your individual business location as directly as possible, or provide one website that represents your individual business location (if you have one).
3. Please provide the timing of the same location as given in Business Address. We can update other timings of different locations through creative posts.
4. Please provide pictures of your business (At work, Interior, Exterior and Team) & Videos relevant to your business. And also Logo (Profile Picture) & Cover Photo.
5. Please provide us the services that you provide.

[From the above mentioned information we will start setting up your profiles]

If you have an existing GMB listing ; there are two ways to give us the access:-

1. Provide us with the Mail ID & Password.
2. You can visit GMB dashboard and from the users section you can add us as your GMB listing Manager / Owner.

## 2. For Facebook :

> If you have an existing page , and if you want that page to be maintained by us just make us the ADMIN from the page roles section of your page. Once we got the access we will start the job.

### Requirements :

1. Profile Picture.
2. Location
3. Timings
4. Details of your services.
5. Service Areas.
6. Information or Bio Data for descriptions

## 3. For Youtube :

- > We Just need your GMB ID & Password for the creation of your youtube Channel.
- > Contents for the youtube videos will be discussed.

## 4. For Website :

# What we need from you?

## For Google My Business :

1. Please provide precise, accurate address and/or service area to describe your business location. P.O. boxes or mailboxes located at remote locations are not acceptable. Only one business location will be accepted. You can provide us with service areas (Only 18 service areas can be updated on Google Listing not more than that). **[One genuine business address and 18+ Service Areas]**
2. Provide a phone number that connects to your individual business location as directly as possible, **or** provide one website that represents your individual business location (if you have one).
3. Please provide the timing of the same location as given in Business Address. We can update other timings of different locations through creative posts.
4. Please provide pictures of your business (**At work, Interior, Exterior and Team**) & **Videos** relevant to your business. And also Logo (Profile Picture) & Cover Photo.
5. Please provide us the **services that you provide**.

**[From the above mentioned information we will start setting up your profiles]**

This is your GMB Listing. So we just need the access for optimization of your GMB Account.

<https://goo.gl/maps/jdPryH7uEaNYHijC9> - Your Listing Link.

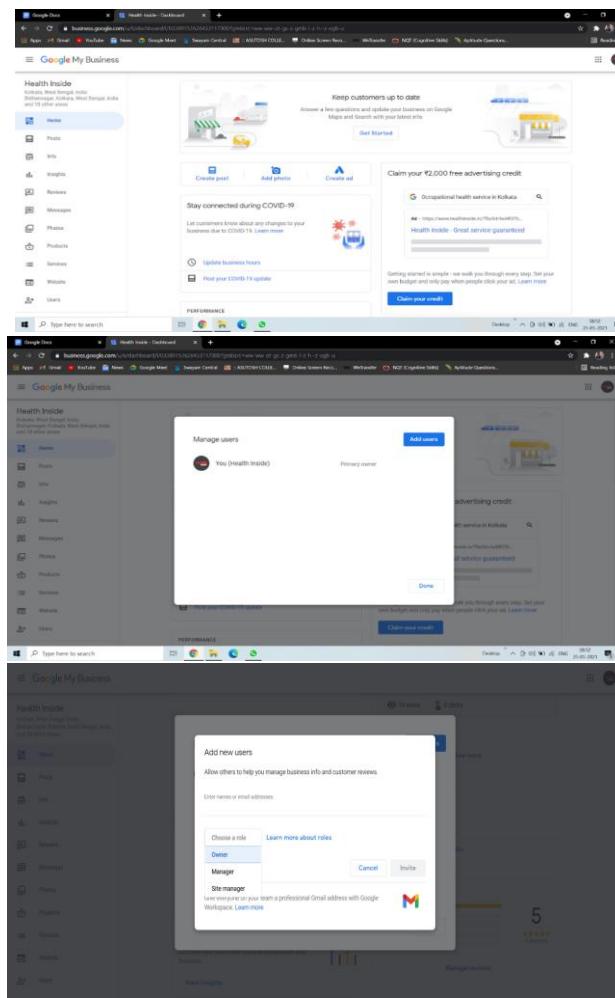

**As you have an existing GMB listing ; there are two ways to give us the access:-**

1. Provide us with the Mail ID & Password.
2. You can visit GMB dashboard and from the users section you can add us as your GMB listing Manager / Owner.

**NOTE: We would like to suggest that add us as a Owner so that we can troubleshoot any GMB related problem without getting you disturbed.**

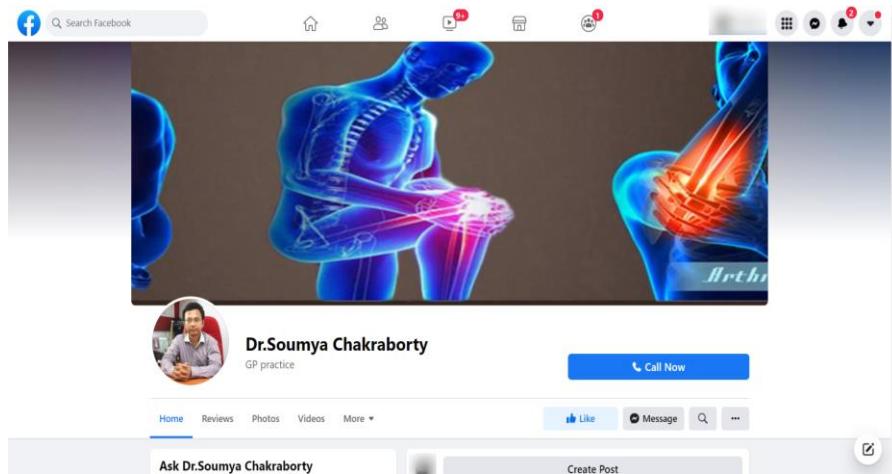

Let's see how can you add user from your GMB dashboard,

- 1. Open your google my business account. The site will look like the picture above.**
- 2. On the left of the GMB Page you will find Users option click on that option.**
- 3. Once you click on that option a small window will pop up it will show your business name (as PRIMARY OWNER).**
- 4. Click on the ADD USERS option at the top right corner.**
- 5. Then the ADD NEW USERS window will pop up ; here enter the name or email address and then click on CHOOSE A ROLE ( OWNER/MANAGER OR SITE MANAGER) select any one of them then click on the INVITE option.  
INVITATION WILL BE RECEIVED.**

## 2. For Facebook :

During the detailed study we got to know that you have a facebook account :

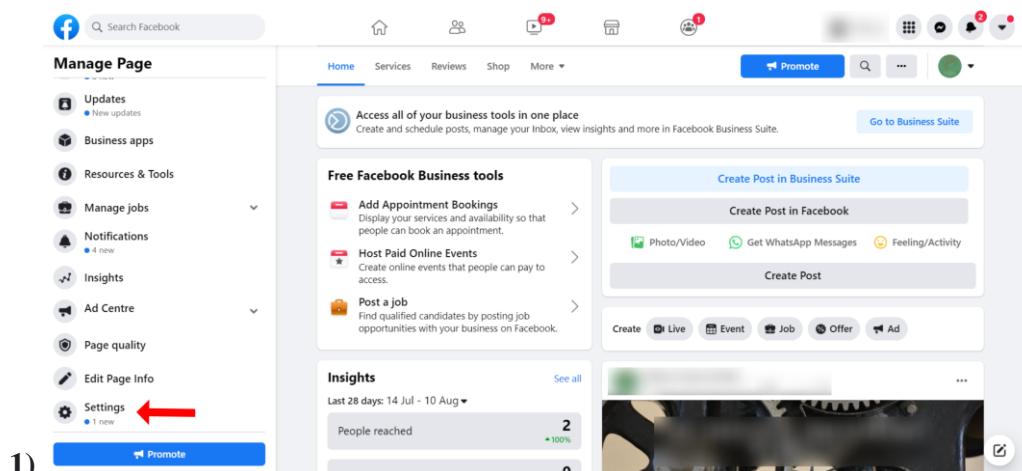

So, we would like to manage this facebook page as it has few followers so it would be a little bit easier to reach the audience via our creative posts / Videos.

So, Let's see How to add Page Admin on Facebook :

1. Tap in the top right of Facebook.
2. Tap Pages, then select your Page.
3. Tap then tap on the Settings.
4. Tap on the Page Roles.
5. Tap Add Person to Page. You may need to enter your password to continue.
6. Begin typing a name and tap it from the list that appears.
7. Tap to choose a role, then tap Add.

**FOLLOW THE STEPS :**

2)

The screenshot shows the 'Page settings' interface for a Facebook page. On the left, a sidebar lists various settings categories: General, Messaging, Page info, Templates and tabs, Notifications, Advanced messaging, Page roles (with a red arrow pointing to it), People and other Pages, Preferred Page Audience, and issue, electoral or political ads. The main content area is titled 'Page visibility' and contains numerous configuration options like 'Visitor posts', 'News Feed audience and visibility for posts', and 'Post and story sharing'. At the bottom right of the main area, there is a small 'Edit' button.

3)

This screenshot shows the 'Page roles' section of the Facebook page settings. It includes sections for 'Assign a new Page role' and 'Existing Page roles'. In the 'Assign a new Page role' section, a red arrow points to the input field where an email address is being typed. The input field contains 'abc@xymmail.com'. Below the input field, there is a brief description of the permissions for an Admin role. To the right of the input field, there is a dropdown menu with several role options: Admin, Editor, Moderator, Advisor, Analyst, and Add. The 'Editor' option is currently selected, indicated by a checked checkbox. A blue 'Add' button is located at the bottom right of the dropdown menu.

4)

This screenshot is identical to the previous one, showing the 'Assign a new Page role' section. The red arrow now points to the 'Editor' option in the dropdown menu, indicating that the user has selected this role for the specified user. The 'Add' button remains visible at the bottom right of the dropdown.

We Also Need,

1. Profile Picture. 2. Address. 3. Phone Number which you want to add. 4. Services.

## **5. Timings.**

## **3. For Youtube :**

> We Just need your GMB ID & Password for the creation of your youtube Channel.

> Contents for the youtube videos will be discussed.

## **4. For Websites :**

As it will be a one pager site.

### **We will keep few important things only :**

\* *About Us : (About the doctor and his qualification, Attachments)*

\* *Why Us : (Why you? & Specializations)*

\* *Services : that you provide.*

\* *Patient Testimonial*

\* *Blogs Section.*

\* *Contact Information – Google Maps / Phone Number/ Other Attachments.*

### **What we will Need?**

\* *Services that you provide.*

\* *Your CV where we can find in and out information about you.*

\* *Articles which are going to be updated on the website as blogs.*

\* *Attachments & Contact Details.*
